DETAILED ACTION

Allowable Subject Matter

1. Claims 7-23,26-28 are allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claim 7, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed limitations which include an image display apparatus comprising a reflective display, illumination means, first and second optical members wherein an optical surface A having two functions of transmission and reflection, shared between an illumination optical system and a display optical system, has a curvature on a local meridional section, where local-fy represents a focal length in the local meridional section of the display optical system and local-fyA a focal length in the local meridional section of only the optical surface A in the following condition as claimed.

Regarding claim 13, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed limitations which include an image display apparatus comprising a reflective display, illumination means, first and second optical members wherein when a reference ray is defined as a ray which is illumination light from said illumination means that is reflected at the center of said display means and emerges therefrom and is incident on the center of a pupil, and a plane that includes

incident light and exit light of the reference ray in each surface is defined as a local meridional section in each surface, the following condition is satisfied as claimed.

Regarding claim 21, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed limitations which include an image display apparatus comprising a reflective display, illumination means, first and second optical members wherein an exit light of the reference ray in each surface is defined as a local meridional section in each surface, in the local meridional section of a display means surface, the optical path length of a ray, in said first optical member, that passes a most peripheral image on said display means at a far side from the observation position and a center of the pupil is longer than the optical path length of a ray, in said first optical member, that passes a most peripheral image on said display means at a near side from the observation position and the center of the pupil, and, wherein said display optical system includes a plurality of reflecting surfaces in said second optical member as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
